

Application

SKF LHRP 1 is a thixotropic, white spirit dispersed anti-corrosive, providing long term corrosion protection to ferrous and non-ferrous materials. The product leaves a stable protecting film. Protected metal parts can easily be cleaned in any cleaning operation because the thixotropic film is readily liquified by slight mechanical agitation or heat.

Bearings do not have to be cleaned from SKF LHRP 1 prior to the application of greases, as it does not influence the performance of the greases. LHRP 1 is available in 5 litre (1.3 US gal.) cans.

Technical data

Designation	LHRP 1/5
Grade	LHRP 1
Appearance	Hazy
Viscosity	Not valid because of thixotropic nature
Film thickness	Ca. 5-10 um after evaporation of the solvent
Film type	Thixotropic
Specific gravity	0,815 g/cm ³
Flash point	39 °C (102 °F)
Pour point	-20 °C (-4 °F)
Drying time	30 min. minimum under ventilation
Solids content	Approx. 30%
