

Application

SKF pressure gauges are designed to fit SKF hydraulic pumps and oil injectors.

Description

SKF pressure gauges are of the Bourdon tube type and have stainless steel cases. The gauges are either liquid filled and/or equipped with a restriction screw in order to absorb any sudden pressure drops and help prevent damage to the internal gauge workings. All gauges have dual scales (MPa/psi) and have safety glass and blowout discs as standard.

Technical data

Designation	Pressure range		Diameter H		Connection thread	Weight		Accuracy
	MPa	psi	mm	inch		kg	lb	
1077587	0-120	0 - 17,400	100	3.94	G 1/2	0,80	1.8	1
1077587/2	0-100	0 - 14,500	63	2.48	G 1/4	0,25	0.6	1,6
1077589	0-300	0 - 43,500	100	3.94	G 1/2	0,80	1.8	1
1077589/2	0-400	0 - 58,000	100	3.94	G 1/2	0,80	1.8	1
