SKF LGBB 2 is a lithium complex/synthetic PAO oil based grease specially designed for extreme conditions involving very low speeds, high loads, low temperatures and oscillating conditions. This grease provides proper lubrication whether the turbine is operating or in stand-still mode, installed onshore, offshore, or in cold climate areas.

- Excellent false brinelling protection
- Excellent performance under high loads
- Excellent performance at low temperature starting torque
- Good pumpability down to low temperatures
- Excellent water resistance
- Excellent corrosion protection
- High thermal and mechanical stability

Typical applications:
- Wind turbine blade and yaw bearing applications
### Technical data

| Designation LGBB 2/(pack size) | Water resistance  
DIN 51 807/1,  
3 hours at 90 °C | Oil separation  
DIN 51817,  
7 days at 40 °C, static, % | Copper corrosion  
DIN 51 811, 120 °C | EP performances  
Wear scar DIN 51350/5, 1400 N, mm 4-ball test, welding load DIN 51350/4, N | Rolling bearing lubrication ability  
Fe8, DIN 51819,  
80 kN, 80 °C, C/P 1.8, 500 h | False brinelling resistance  
ASTM D4170 FAFNIR test, mg | Available packsizes |

* Typical value

**SKF lubricants offer major competitive advantages:**

- Designed and tested to outperform under real conditions
- Product data include specific test results enabling a better selection
- Strict quality control of every production batch help ensure consistent performance
- Quality control allows SKF to offer a five–year shelf–life* from the date of production

Production processes and raw materials vastly influence grease properties and performance. It is virtually impossible to select or compare greases based only on their composition. Therefore, performance tests are needed to provide crucial information. In over 100 years, SKF has accrued vast knowledge about the interaction of lubricants, materials and surfaces.

This knowledge has led SKF, in many cases, to set industry standards in bearing lubricant testing. Emcor, ROF, ROF+, V2F, R2F and Bequiet are just some of the multiple tests developed by SKF to assess the performance of lubricants under bearing operating conditions. Many of them are widely used by lubricant manufacturers worldwide.

* SKF LGFP 2 food grade grease offers a two–year shelf–life from the date of production
